

 A.C. Sheets are produced by people who know Roofing Sheets the best. They have decades of experience of A.C. Sheeting. Best quality of the product born out of exceptional workmanship has always been a strong point with us.

 A.C. Sheets are manufactured strictly as per IS 459 using the best quality raw materials. The sheets are made on latest machines resulting in uniform thickness and smooth edges leading to proper and appealing presentation.

As far as strength is concerned our sheets invariably surpass the minimum standards laid down by the B.I.S. by a substantial margin.

 A.C. Sheets are moulded on all imported moulds resulting in proper matching of the corrugations. This ensures proper sealing at the side and end laps.

 A.C. accessories such as Ridges, North Light Curves, etc. Given a snug fit to the sheets making it possible to have a good appearance and presentable elevations.

**TECHNICAL DATA**

Thickness	= 8 mm (+Free, -0.5 mm)	Depth of corrugation	= 46 mm (+3mm, -5mm)
Over all Width	= 1.05M (+10mm, -5mm)	Pitch of Corrugation	= 146 (+5mm, 2mm)
Laid Width	= 1.01M (+10mm, -5mm)	End Lap	= 150 mm (Minimum)
Lengths	= 3.00, 2.75, 2.50, 2.25, 2.00 1.75, 1.5M (+5mm, -10 mm)	Free Overhang	= 300 mm (Maximum)
		Weight	= 12.60 KG Per Running Meter 12.19 KG Per Square Meter

Tolerance given in this table for pitch corrugation relates to measurement over six pitches for corrugated sheets
